PROFESSIONAL SUMMARY

Results-driven Information Technology student with hands-on experience in full-stack web development, AI integration, and enterprise information systems. Proficient in building responsive, user-centric applications and configuring reliable database architectures using React.js, TypeScript, Node.js, and Python. Proven track record collaborating across cross-functional teams to engineer scalable software solutions ranging from biometric attendance and military camp navigation to civic disaster resilience and automated financial analytics.

PROJECTS

FeasiFy (Automated Feasibility & Analytics Platform)

January 2026 – Present

Lead Full-Stack Developer

React.js, TypeScript, Gemini AI, OpenAI API, Firebase

- Engineered an AI-powered financial feasibility system to assist CBA Financial Management students in project viability assessment, automated financial calculations, and break-even computations.
- Architected dynamic reactive data workflows with Firebase and integrated AI APIs to deliver automated risk assessments, viability projections, and executive summary exports.

PAIS 2.0 (PNP-ITMS Personnel & Assignment Information System)

2026

Full-Stack Developer

React, TypeScript, Tailwind CSS, Express, Supabase, PostgreSQL

- Developed an enterprise HR directory managing personnel records, training certifications, leave tracking, automated service histories, and official assignment orders.
- Implemented robust Role-Based Access Control (RBAC) and automated time-in-grade calculations to streamline rank promotions, data security, and audit-ready reporting.

P-IDTMS (PNP-ITMS Biometric & QR Attendance System)

2026

Full-Stack Developer

Python, OpenCV, React, TypeScript, Express, Supabase, MySQL

- Engineered an enterprise attendance platform combining real-time facial recognition pipelines and encrypted QR validation to eliminate proxy check-ins for student interns.
- Built an administrative dashboard with automated duty-hour calculation, Daily Time Record (DTR) logging, and supervisory evaluation digest generation.

Camp Navi (Camp Crame Geofencing & Facility Navigation Platform)

2026

Full-Stack Developer

React, TypeScript, Leaflet.js, PostGIS, Supabase, Tailwind CSS

- Engineered an interactive wayfinding and facility navigation application tailored for PNP Camp Crame headquarters to guide personnel, interns, and official visitors.
- Implemented Dijkstra safe routing to calculate optimal walking paths avoiding restricted zones, supported by live directorate search and compound landmark filtering.

Alerto-PH (Community Disaster Warning & Flood Resilience Platform)

2026

Full-Stack Developer

React, TypeScript, Leaflet.js, Node.js, Tailwind CSS, PAGASA Telemetry

- Created a civic disaster resilience application integrating PAGASA weather telemetry with crowdsourced hazard reporting to recommend safe, flood-free transit routes.
- Integrated interactive geospatial map overlays, real-time community incident pinning, emergency status updates, and a verified disaster hotline directory.

EDUCATION

Pamantasan ng Lungsod ng Valenzuela (PLV)

Expected Graduation: June 2027

Bachelor of Science in Information Technology

Valenzuela City, Philippines

SKILLS & TECHNICAL ARSENAL

Frontend & UI/UX: React.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, Vite, Leaflet.js, Figma

Backend & Languages: Node.js, Express.js, Python, Django, Java, PHP, RESTful APIs

Databases & Cloud: PostgreSQL, Supabase, MySQL, Firebase (Firestore), PostGIS, MSSQL, Vercel

DevOps, AI & Tools: Docker, Git, GitHub, Google Gemini AI, OpenAI API, OpenCV, VS Code, VirtualBox, PyCharm

Networking & Security: Network Protocols, Subnetting, IP Configuration, VLAN, Role-Based Access Control (RBAC)
