PROFESSIONAL SUMMARY

Results-driven Information Technology student with hands-on experience in network protocols and cybersecurity practices. Adept at integrating modern security tools and developing robust systems using advanced programming languages. Proven ability to collaborate in cross-functional teams to ensure secure and efficient IT infrastructures.

PROJECTS

FeasiFy

January 2026 – Present

Full-Stack Developer

- Engineered an AI-assisted web-based financial feasibility system to support CBA Financial Management students in project viability assessment.
- Architected dynamic frontend and backend using React.js, TypeScript, and Firebase, ensuring real-time data handling and secure user authentication.
- Integrated OpenAI API to deliver automated, intelligent financial insights based on user inputs, enhancing decision-making efficiency.

Barangay-Equipment-Borrowing-and-Tracking-System

August 2025 – December 2025

Full-Stack Developer

- Developed a web-based application for tracking and borrowing local barangay equipment, streamlining the inventory management process.
- Designed and implemented a responsive interface using HTML5 and CSS3, ensuring seamless navigation for community users and staff.
- Collaborated with stakeholders to gather requirements and enhance system features based on user feedback, improving overall functionality.

Django Sales Dashboard Report System

August 2025 – December 2025

Full-Stack Developer

- Developed a comprehensive corporate sales tracking and reporting dashboard utilizing the Django web framework to streamline business metrics evaluation and transaction monitoring.
- Designed and implemented custom analytics visualizations and modular reporting utilities using Python, improving overall data visibility for end-users.
- Optimized database interactions and information rendering modules to generate real-time, structured statistical reports for daily business operations.

Mang Delfin's Putong Pulo Web Platform

January 2025 – May 2025

Full-Stack Developer

- Engineered a highly responsive, multi-page marketing and storefront platform to showcase local delicacies, significantly enhancing the business's digital presence and customer accessibility.
- Built interactive product carousels, a custom branch locator, and dynamic product overlay modals utilizing semantic HTML5, CSS3 structural grids, and vanilla JavaScript.
- Integrated a backend database architecture using PHP to process, route, and securely store automated customer feedback and contact inquiries.

EDUCATION

Pamantasan ng Lungsod ng Valenzuela (PLV)

Expected Graduation: June 2027

Bachelor of Science in Information Technology

Valenzuela City, Philippines

SKILLS

TypeScript; JavaScript; HTML5; CSS3; React.js; Firebase; OpenAI API; Google Gemini API; Networking Protocols; Subnetting; IP Configuration; Agile Development; Analytical Thinking; Problem-Solving
